

## WIX 57323 Supersedes 57313

At WIX Filters we are dedicated to innovation and the ongoing improvement of our product offerings and are pleased to introduce the new WIX 57323. The WIX 57323 will fully supersede the WIX 57313.

Offered for specific Powerstroke® applications, you may already be familiar with the WIX 57313 filter kit, but let's take a look at its successor the new WIX 57323 filter kit.

The WIX 57323 filter kit offers some substantial differences when compared to its predecessor and incorporates upgrades to every part of the assembly. Here are a few of the noteworthy enhancements:

- Upgraded cap material
- Enhanced O-ring composition
- Next generation adhesives

These changes represent significant structural advances that were substantial enough to dictate a change in part number for means of identification.

These enhancements and are being made as part of an ongoing product strategy that focuses on innovation and continuing product improvement.

The new WIX 57323 filter kit.
