Offering High-Performance Air Filters for Motorcycles and ATV's

To reach the off-road dirt bike and ATV market, WIX Filters has teamed up with No-Toil to provide top performance dual-stage foam air filters. There are 46 filter numbers covering 158 different applications in Honda, Kawasaki, Yamaha, KTM, Arctic Cat, Polaris and Suzuki.

No-Toil is in their 7th year in the industry and has received outstanding recognition for their products.

- Product of the Year by Dirt Rider Magazine
- Product of the Decade in Australia
- Named Top 50 Favorite Products in the industry by Dirt Rider Magazine – Ranked 15th
- Private labels oil, cleaner and rim grease for Honda as ProHonda and Kawasaki as Kawachem

Company History

The story of No-toil is a stereotypical “started in a garage” saga. Bob Jensen, No-Toil founder, has been riding motorcycles since the 60's. Over the years, he realized that cleaning dirty foam air filters is a real pain in the neck. So, he set out to develop an easier, safer and better way to oil and clean foam air filters. He wanted to be able to clean his filter in his sink, but since his house uses a septic system, he was not able to use gas or harsh solvents. After months of research and testing, Bob revolutionized the industry with his creation of the world's first biodegradable and non-toxic air filter oil. He was able to make cleaning easier without compromising the performance of the filter.

Performance Advantage by Construction

No-Toil air filters are constructed with a two-stage foam layer design. Each foam layer has a different pore size allowing optimum trapping area for even the smallest dust particles. The layers of foam are flame-laminated not glued, allowing maximum airflow. The reticulated foam increases dirt stopping surface area and increases foam strength. Even the glue used in the seams will withstand harsh solvents and gas. How strong is the filter? Try pulling as hard as you can. The foam will rip before the glue seam will. The light color foam makes it easier to spot where the oil has covered and has not. All filters retain the OEM size for dirt stopping capability. Each filter is handmade and hand inspected in the USA to ensure top quality design.

Chemicals

In addition to the performance foam air filter, WIX is offering the No-Toil oiling and cleaning products. The No-Toil oil is available in a regular 16 oz. Bottle or in an aerosol spray. WIX carries the No-Toil cleaner, rim grease, air box cleaner and maintenance kit.

What sets the No-Toil chemicals apart from our competitors?

All the chemicals are biodegradable and non-toxic. Many of the competitors claim to have “bio-safe” chemicals, but it is not non-toxic. A user would still have to use a washtub and dispose of it properly. All biodegradable means is after a 28-day period the material showed some signs of degradation. Whereas, non-toxic means it will not harm the environment. The chemicals are also skin-safe.

Oil

The filter oil is a SUPER TACKY, DIRT GRABBING, 100% WATER PROOF and increases HORSPOWER. It will not wash out with gas, solvents or water alone, but the filter will clean amazingly fast and easy with the No-Toil filter cleaner and water so, cleaning is easy! Gloves need to be used when applying the oil. Once the filter is dry, saturate the filter with the oil, squeeze out any excess oil, allow the filter to stand for 15 minutes and then reinstall. If the oil gets on your hands, just use a little No-Toil cleaner and some water to remove. It's that safe!

Cleaners

The cleaner is a heavy duty, concentrated, biodegradable cleaner developed especially to clean quality foam and fabric air filter elements treated with the No-Toil filter oil or No-Toil rim grease. The cleaner is a dry powder and designed to mix with water. No solvents are required with the cleaner in removing the oil from the filter. It breaks down the waterproofing chemicals of the oil and rim grease. This cleaner has no fumes or odors and is safe enough for the skin.

The air box cleaner is just as safe. Spray it onto the air box and wait 90 seconds, then wipe the air box down. It's that easy, safe and cleans great!

Rim Grease

The No-Toil rim grease is a high-viscosity, non-petroleum based compound. It can withstand up to 300 degree Fahrenheit temperatures and remain waterproof as well as dustproof.

Maintenance Kit

The No-Toil maintenance kit comes with everything needed to clean the WIX / No-Toil filter – oil, cleaner and rim grease. Because the No-Toil chemicals are safe, the filter can be cleaned in the kitchen sink or a bucket. Fill the sink or bucket with 3 to 4 inches of warm water, add ¼ cup of cleaner, agitate by hand any undissolved cleaner, add the dirty filter, agitate until clean and rinse the filter thoroughly with clean, warm water. Then squeeze (don't wring) water from the filter and allow it to dry. Once the filter is dry, it's ready to be oiled.

WIX / No-Toil Power Points

- Filter Strength (Hard to tear or rip as opposed to K&N, UNI)
- Oil is waterproof – it won't wash off with water
- More Airflow – compared to petroleum molecules
- Super tacky – stops dirt, dust
- Easy to clean
- Eco-Friendly – Biodegradable & Non-Toxic
- Some competitive filters will come apart after being soaked in solvent/gasoline whereas a No-Toil filter stays together
- More Horsepower
