Upgrades your air filter system and saves on maintenance costs

Housing built by Visteon® and fits in same space as the factory installed housing

WIX Filters Replacement time - 5 minutes, compared to 45 minutes for the original design

Lower restriction and higher air flow - all for 1/3 the costs

Cost savings over existing OEM replacement filters

Step 1:
Pre-assembly of our conversion housing is fast and simple

Step 2:
The conversion housing fits into the OEM footprint. To install, press the pins on the housing's bottom in the battery tray grommets.

Step 3:
Place the WIX Powertrap® air filter in the housing, locking all tabs and clamps.

Step 4:
Reconnect wiring harnesses to the MAFS sensor, filter minder, the coolant reservoir and positive battery cable.
You're Done!

WIX. WHERE IT COUNTS.
